

POWER BETTER CUSTOMER EXPERIENCES

# Smart, reliable voice & messaging

## Hello Commio.

If you manage a platform or service that's designed to engage and delight customers, Commio can help. We're the uniquely customizable, cloud-based communications API platform that makes it easy to deliver better voice and text messaging.

Our flexible, developer-friendly **Messaging API** makes it easy to deliver high-capacity text messaging. From brand and campaign registry to sending through every major gateway, if you can dream it, we can text it.

Intelligent call routing with multiple layers of redundancy means less worry and more happy customers. See beyond the **Voice API** to gain visibility into every call. Then take control of routes and carriers to improve call delivery and quality – plus lower costs.

## 2,000 customers and counting.

Commio – by thinQ and teli – offers industry-first cloud voice and messaging solutions to SaaS, enterprise, and service providers.

Communication is in our name, and our DNA. We believe better voice and messaging eliminates worry, unnecessary cost, and complexity. Our platform and APIs are powerful and easy to use. Think less telecom jargon and more control. Plus expert, U.S.-based support that's there when you need it.

### 5-Star U.S. Support

With the highest-rated support and ease-of-setup according to G2, you can trust us to get you up and running fast. Our U.S.-based team of experts is here to help, from onboarding to number porting and provisioning to brand/campaign SMS setup and more.

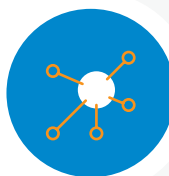

### Committed Usage Discounts

You're unique, and so is our pricing. We can create a custom package that fits your use case perfectly, whether you're a high-volume voice or messaging user. Lock in even more savings when you commit your volume to Commio for one, two, or three years.

### Direct-to-Carrier Pricing

Our carrier team has negotiated direct-to-carrier pricing across our network of 40 voice and six SMS gateways. You can rest easy knowing you'll always get a great price and save over Twilio, Plivo, and others as you scale. Buy domestic and toll-free numbers at a great rate and more.

# You deserve a cloud communication solution that gives you peace of mind.

You need voice and text messaging that gives you total control, transparency, and redundancy so you can focus on what matters most: building amazing experiences that engage and delight customers.

We created Commio for companies that need a reliable, cost-effective, and less complex way to add mission-critical cloud communications to their platforms and services.

Texting is used for everything from keeping in touch to resetting passwords, changing flight itineraries, delivering order confirmations, and more. Calls keep us connected – offering one-on-one and one-to-many communications in real-time. Voice is at the heart of great customer experiences.

Today, texts and calls are powered by the cloud. We trust it because it works – keeping us all connected. But only if we're reaching the right people at the right time.

Our infrastructure and our experts ensure that your calls and text messages are delivered. Our technology scales with you – sending billions of calls and messages every month across 40 layers of redundant carriers with low-latency and industry-leading uptime. Plus, our direct-to-carrier pricing ensures that you pay a great rate for your communications.

Commio offers reliable, cost-effective APIs and a platform that can be easily customized to meet your unique use case. You get better texting and calling with best-in-class service and support. Peace of mind is built-in.

## Better customer experiences start with Commio.

Everyone in your company – from IT to engineering to product – can create better omnichannel customer experiences with cloud voice and messaging:

### Voice

**Deliver conversations with confidence, reliability, and quality with thinQ Voice API platform by Commio.**

No matter your use case, thinQ Voice makes it easy to see beyond the API to control every aspect of your voice calling. Leverage the scale, performance, and redundancy of high-quality carriers and our intelligent call routing technology.

Connect us to any existing CPaaS tech stack so you can enable higher-quality domestic, toll-free, and international calling today. Whether you need to route 5,000 or 50 million calls, thinQ's multi-carrier interconnections and intelligent routing scale to meet any need and deliver maximum uptime. See beyond the API to get complete routing control, full transparency, and automated cost-savings in a solution that has redefined better cloud voice for more than a decade.

### Messaging

**Enable amazing, real-time customer experiences with teli Messaging API platform by Commio.**

teli Messaging gives you the power to embed programmable messaging into applications and software with our SMS/MMS API – ready to handle enterprise-scale across every messaging gateway.

Send any text campaign, alert, or notification effortlessly. From short to long code to toll-free SMS/MMS, we handle everything from campaign registration to message transmission (and everything in between). Send millions of messages through every U.S. gateway to get your content delivered faster. Plus you can rely on our messaging delivery notifications and diagnostic tools to help you keep critical communications flowing.

### Phone Numbers

We make it easy to get the numbers you need to power your solutions without the painful back and forth. Search thousands of numbers instantly. Order one or hundreds with a click. Move your numbers between carriers quickly and easily.

And make sure you get the most accurate routing for your calls with Routing Lookup. Save time and breathe easier with our industry-leading APIs and dashboard – knowing our uncommonly responsive U.S. support team is here to remove roadblocks and carrier issues. Your ports go through smoothly and fast every time.

## Deliver texts and high-quality calls with Commio.

**See beyond the API, and take control of your communications.**

**LET US SHOW YOU HOW EASY IT IS TO GET STARTED.**
